CANDOR *Homes*

POWER YOUR NEW HOME

Upgrade your new home with our tailored solar package, designed to reduce energy use, lower power bills and support a more sustainable lifestyle.

Enjoy greater energy independence, power your home day and night, and add long term value with a system designed to integrate seamlessly with your home and the way you live.

SUSTAINABLE *Modern Living*

WHY CHOOSE SOLAR?

Slash your power bills

Generate and use your own energy to dramatically reduce electricity costs and keep more money in your pocket.

Day & night savings

With smart battery storage, enjoy solar energy whenever you need it, morning, evening, or even during outages.

Sustainable & smart

Reduce your carbon footprint, make your home more energy efficient and increase its long term value.

High-quality products

Equipped with dual glass solar panels, a safe and reliable Sungrow LFP battery, and a hybrid inverter for consistent, high performance energy.

All-inclusive

Ready from day one, fully installed with your new home, no hidden costs or surprises.

Seamless lifestyle integration

Effortlessly powers appliances, lighting and essential systems throughout your home.

Trusted support

Backed by Sungrow expertise, service and robust product warranties for complete peace of mind.

QUESTIONS?

How much energy can it generate?

Enough to power a typical family home.

Are the panels reliable?

Dual glass design for durability and efficiency.

Can I use solar at night?

Yes, with the 9.6kWh battery.

Will it really save me money?

Significantly lowers electricity bills day and night.

Is the battery safe?

LFP batteries are known for thermal stability and safety.

Is the system reliable?

Sungrow inverter with LFP battery delivers proven performance.

How do I monitor performance?

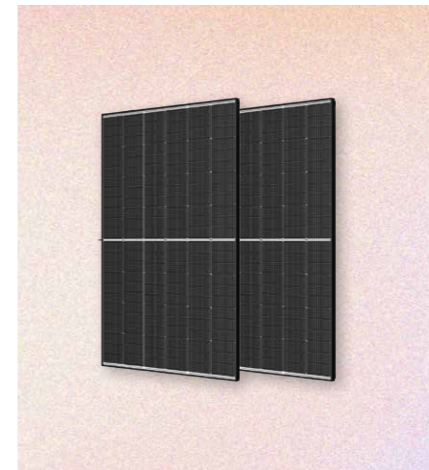

Access real time data via the iSolarCloud app.

Is it compatible with other systems?

Designed to integrate seamlessly with various home energy solutions.

\$17,500

PACKAGE INCLUDED VALUE \$20,000

15 PANELS

6.6KW DUAL GLASS MONOCRYSTALLINE

15 dual glass monocrystalline panels, each 415-440W, deliver a total system size of 6.6kW. These high efficiency panels generate more electricity from sunlight than standard panels, giving your home more power.

BENEFITS

Reliable energy

Dual glass panels are more resistant to environmental factors like humidity and corrosion, ensuring consistent performance over time.

Sleek, modern design

All black aesthetic complements your roof, enhancing your home's curb appeal.

Long-lasting durability

Designed to withstand harsh weather conditions, these panels offer a longer lifespan compared to traditional panels.

BATTERY

9.6KWH HIGH-VOLTAGE LFP BATTERY

A high capacity LFP (Lithium Iron Phosphate) battery stores excess solar energy for use at night or when the sun isn't shining, allowing you to enjoy your own clean energy 24/7 while reducing reliance on the grid and slashing your power bills.

BENEFITS

Reduced electricity costs

Generate and store power to reduce reliance on the grid. Use stored energy during peak periods to cut electricity costs.

Backup power

Provides a reliable source during outages, keeping essential systems running.

Eco-friendly

Safe, long lasting LFP batteries free from cobalt and nickel, a cleaner, more sustainable choice.

INVERTER

HYBRID SINGLE PHASE INVERTER

The inverter converts solar energy into usable electricity for your home and manages battery storage efficiently. It keeps your system running smoothly, maximises your energy use, and helps protect your investment for years to come.

BENEFITS

Smart management

Real time data monitoring lets you track your home's energy production and usage, helping you make the most of every kilowatt.

Seamless integration

Easily integrates with your existing home energy system for optimal performance.

User-friendly

Designed for everyday living. Simple controls, minimal upkeep and easy maintenance ensure hassle free performance year round.

TAKE THE NEXT STEP

Your new Candor home is more than a home, it's a smart, energy efficient investment designed for long term performance and savings.

Enhance your build with our premium solar upgrade and enjoy the benefits of lower power bills, greater energy independence and a more sustainable lifestyle.
